SKILLS

TECHNICAL

Python, C, C++, Java, JavaScript, CSS, HTML, Angular, Flask, Git, LaTeX, GDB, x86, Ghidra, Linux,

GENERAL

Presenting, Technical Writing, Proofreading, Team Management, Agile

INTERESTS

Reverse Engineering, Binary Exploitation, Vulnerability Research, Cybersecurity, Cyber Operations, Software Engineering

EDUCATION

TEXAS A&M UNIVERSITY | NATIONAL CENTER OF ACADEMIC EXCELLENCE (CAE)

B.A in Computing, Minor in Cybersecurity, Minor in English

Graduation: May 2025, GPA: 3.71 / 4.00

EXPERIENCE

BATTELLE | REVERSE ENGINEERING AND VULNERABILITY RESEARCH INTERN

May 2023 - August 2024

- Conducted in-depth reverse engineering project on SOHO (Small Office/Home Office) devices
- Crafted proof of concept exploits for identified vulnerabilities
- Utilized the Ghidra scripting API to automate discoveries and leveraged Kubernetes to streamline vulnerability research
- Presented findings to a non-technical audience
- Authored extensive project documentation for future interns

SANDIA NATIONAL LABORATORIES | CYBERSECURITY RESEARCH AND DEVELOPMENT INTERN

June 2022 - November 2022

- Tracer FIRE: Assisted in the development of Tracer FIRE (Forensic and Incident Response Exercise) for the U.S. Department of Energy (DOE). This program has trained several hundred cybersecurity incident responders (CSIRs) from the DOE, other U.S. government agencies, and critical infrastructure organizations
 - Collaboratively developed attack chains and malware related to cyber attacks from the previous year. Configured forensic systems for artifact/log collection
- Detection as Code: Assisted the incident response team with automating detection engineering pipelines
 - Customized SIGMA (generic signature format for SIEM systems) configurations to output Splunk processing language (SPL) queries for in-house query standardization

TAMUCTF | CHALLENGE DEVELOPER

January 2022 - May 2023

- Collaboratively created cybersecurity challenges to encourage critical thinking and deep understanding of cybersecurity vulnerabilities
- Hosted competition with 40 challenges and 2000+ competitors
- Included topics such as reverse engineering, digital forensics, and binary exploitation

TEXAS A&M CYBERSECURITY CLUB | PRESIDENT

May 2023 - Present

- Oversee a large student organization dedicated to cybersecurity education
- Assist in the preparation and organization of lectures, demos, and any other materials for club events
- Deliver foundational cybersecurity lectures to members
- Lead officer meetings and facilitate good communication between club leadership
- Coordinate recruiting events to attract new club members
- Previous Role: Secretary, January 2021 - May 2023
